Vital Super Clear

A high quality, sustainable, rapid acting coagulant for high efficiency sediment (HES) basins, sewerage, groundwater and wash down bay water treatment.

PROUDLY AUSTRALIAN MADE & OWNED

Fine colloidal clay particles washed from construction sites by excess stormwater runoff can carry significant environmental pollutants to receiving waters. Vital Super Clear is a high strength industrial water treatment product, which neutralises the particulate charge and allows coagulation and settling of particles. Vital Super Clear is an Aluminium Chlorohydrate-based formulation.

- Concentrated, high strength, low dosing
- Cost effective
- Easy to apply liquid - no dust
- Automated dosing system compatible or manual dosing
- Excellent resultant clarity
- Efficient settling
- pH range (6-9) compatible
- Reduced alkalinity consumption (little pH drop)
- Significantly low aluminium residuals in treated water
- Very low trace element levels
- Resultant inert, re-usable sludge
- Non-Dangerous Goods
- No sulphates
